NORDIC TASTE | Pre-finished Square Tiles

STOCKHOLM

The Nordic taste is more than a style. It has established itself over time as a real philosophy of life that combines functionality and aesthetics, while remaining welcoming and refined.

In the Scandinavian style, linearity and simplicity are going steady with the precision of the geometric shapes and blocks of color. The Scandinavians love the contrasts and the integration between square and clean forms with the more gentle and rounded ones.

Inspired by the forests of the North, the pattern floor Stockholm is produced using a light and luminous wooden species, such as oak, treated naturally to better enhance the texture of the wood.

It's a simple, clean and aesthetically beautiful design, inspired by the Nordic nature and climate.
