

The excitement of the mind, brilliant intuition, pure creativity, but mainly a source of inspiration. All the meanings of the word “inspiration” fit perfectly to this Berti wooden floors collection. Each item has its extra special touch compared to the standard products and wood species, thanks to its particular manufacturing process, colours and finishings. New solutions and new interpretations of wooden floor come into life, for meeting the most refined tastes and precise needs. In this way we can realise a different idea, that has been not defined yet, satisfy a demanding customer or a whim.

Sometimes you don't need to invent anything. Just be inspired.
